NEW EVERBLOOMING ROSES for 1935

Never before in the history of the rose-growing industry have a more remarkable group of new roses been offered to rose enthusiasts than those described on this page. We feel confident that our customers will derive much pleasure from these plants and urgently recommend that they include one or more, if not the entire group in their orders.

BETTER TIMES *U. S. Plant Patent No. 23*

The enthusiastic euphony of its name is at once reflected in the brilliance of its flower, vivid cerise pink, a color that fairly scintillates in the sunlight. The texture of the flower is very firm, thereby insuring good lasting qualities, and the foliage is luxuriant and leathery. Extremely popular as a cut flower, the stems are strong.

Price, 2-year-old dormant plants up to April 10th, \$1.50 each; pot-grown, \$1.75 each.

CRIMSON GLORY *U. S. Plant Patent No. 105*

This beautiful rose gives every promise of becoming one of our most popular and best garden varieties. It is a vigorous grower, producing a great abundance of superb blooms. The plant is of spreading habit, so desirable for garden planting. The large buds are of typical urn-shape, as shown in the illustration. They open into full, well-formed blooms of a deep vivid crimson, shaded ox-blood red and finished with a soft velvety nap. Awarded Silver Medal, International Flower Show, New York, Spring, 1934.

Price, 2-year-old dormant plants up to April 10th, \$1.50 each; pot-grown, \$1.75 each.

FEU PERNET-DUCHER *U. S. Plant Patent No. 103*

From all indications, Feu Pernet-Ducher bids fair to be the outstanding yellow garden rose of the decade. It is said to possess unusual vigor, hardiness and disease-resistance and is a continuous bloomer from June until frost. The flower is very large, fully double, with from 80 to 100 petals, the color being a rich yellow which grows lighter toward the edges where the petals are lightly flushed with pink. There is also sometimes a tinge of red in the center of the flower.

Price, 2-year-old dormant plants up to April 10th, \$2.00 each; pot-grown, \$2.25 each.

LITTLE BEAUTY

An entirely distinct type of ever-blooming rose. It is extremely free blooming, the flowers, which average from 2½ to 3 inches across, possess a lovely cup formation, and the color in the bud stage is cerise pink which, as the flower develops, becomes a soft, deep pink with a warmth and loveliness that appeals to all. It is a perfect garden rose, a true everbloomer and an excellent cutting variety.

Price, 2-year-old dormant plants up to April 10th, \$1.50 each; pot-grown, \$1.75 each.

NIGRETTE *U. S. Plant Patent No. 87*

None genuine without this plant label

Blackish maroon. The almost black buds open to dark maroon blooms which in their deepest shades give the impression of black velvet. It is so dark that when it was first shown the newspapers throughout the world heralded it as "The Black Rose of Sangerhausen." Certainly, never before have we seen a rose which for its depth of coloring called forth such praise and astonishment. The color varies with the season and weather through many delightful shades. With us the flowers are at their best and darkest after the cool nights of autumn arrive.

Nigrette's popularity will not depend solely on its remarkable color, for it is unusually fragrant, with a delightful old-rose scent, and the medium-sized plants are almost continuously in bloom.

This is a novelty rose that will give you pleasure from June until frost. (*Patentee's description.*)

Price, 2-year-old dormant plants up to April 10th, \$2.00 each; \$20.00 doz.; pot-grown, \$2.25 each, \$22.50 doz.

TOKEN *U. S. Plant Patent No. 95*

The most admired rose at the 1934 International Flower Show. Particularly appealing for its long, high pointed bud and its magnificent color. A color that is full of life, apricot orange shading to golden pink. In the garden it develops a strong upright growth, the foliage is glossy and disease resisting; extremely free blooming.

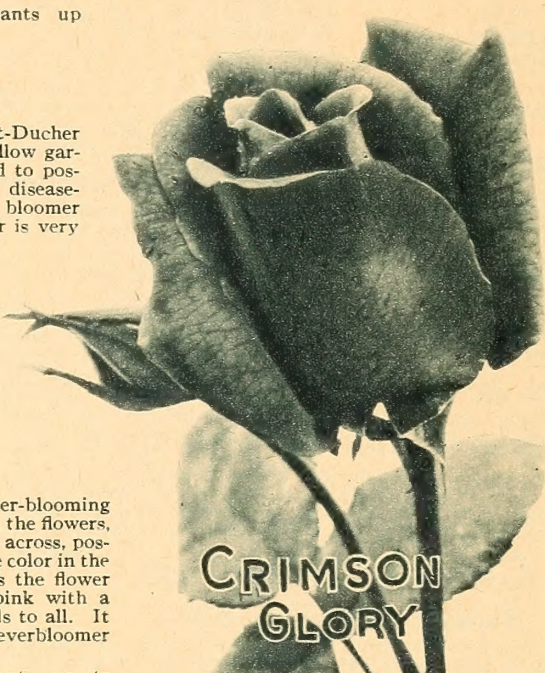

Price, 2-year-old dormant plants up to April 10th, \$1.50 each; pot-grown, \$1.75 each.

VIVID MASON *U. S. Plant Patent No. 52*

Few roses have had the advantage of appearing in a preview, so to speak, before such an extensive audience as did Vivid Mason. A large bed of it was planted at the Century of Progress, where it commanded the attention and admiration of hundreds of thousands of people.

Its vigorous upright growth bespeaks a rugged constitution. The flowers are perfectly formed, the petals possess a firm texture and the color is the most vivid rosy red ever beheld in a flower. Under the trying conditions at Chicago it never appeared without blossoms.

Price, 2-year-old dormant plants up to April 10th, \$1.50 each; pot-grown, \$1.75 each.

SPECIAL OFFER: One 2-year-old dormant plant each of the 7 New Everblooming Roses for 1935 up to April 10th for \$10.00. Pot-grown plants, \$12.00.

COUNTESS VANDAL

U. S. Plant Patent No. 38

This beautifully colored rose of graceful form won the coveted Gold Medal of the Toronto Rose Society and scores of other awards, both in this country and abroad. It was greatly admired at the Century of Progress Exposition. The long, pointed buds open into most artistically arranged flowers. The color is very distinctive, a combination of coppery-bronze suffused with soft gold, the reflex of the petals having a silvery sheen. The foliage is attractive, the plant is vigorous, and it blooms throughout the summer.

Price, 2-year-old dormant plants up to April 10th, \$1.25 each; pot-grown plants, \$1.50 each.

MARY HART

U. S. Plant Patent No. 8

The bud is rich maroon and opens into well-formed blossoms of deep velvety, blood-red with an overflow of amber. Unlike many red roses, Mary Hart does not wilt or dry when cut, but opens perfectly. It is a sport of Talisman and possesses the vigorous constitution and other good qualities of this variety.

MRS. J. D. EISELE

U. S. Plant Patent No. 67

The flowers, which when fully opened are frequently from 5 to 6 inches across and have a camellia-like appearance, are unfurled from long, pointed buds. The color is bright cherry-rose overlaid with a scarlet glow, which gives it a lustrous brilliancy, especially under artificial light. As a cut flower, it has wonderful keeping qualities, and its fragrance is that of the sweet, old-fashioned tea roses. It is a free and continuous bloomer.

Price, 2-year-old dormant plants up to April 10th, \$1.50 each; pot-grown plants, \$1.75 each.

We will send our pamphlet, "The Garden Culture of the Rose," free if asked for when ordering.

EVER-BLOOMING ROSES

A SELECTION OF SUPERIOR MERIT

TWO-YEAR-OLD FIELD GROWN PLANTS

Dormant plants ready for shipment from the early part of January up to April 10th. After April 10th, we offer only Pot-Grown plants.

POT-GROWN PLANTS READY FOR SHIPMENT DURING APRIL, MAY AND JUNE

Our Pot-grown Roses are superior to the Roses usually sold because they are cut back and potted early in the fall, giving ample time for root action and to allow the plant to grow naturally. They are sturdy and compact and when sent by express with the soil on the roots transplanting scarcely checks their growth. Send for our free pamphlet, "The Garden Culture of the Rose."

AMÉ QUINARD

Prized for the deep velvety luster of the buds and the crimson maroon tones in the open flower; fragrant. The plant is vigorous and upright.

BETTY UPRICHARD

This lovely Rose is fast becoming one of the most popular garden varieties, on account of its perfectly-shaped, long-pointed bud, its long-lasting qualities when open, and its persistent blooming qualities. CHARLES P. KILHAM

The buds are pointed, opening to perfectly formed, full double flowers of a rich oriental red, flushed with orange and glowing scarlet. A vigorous grower, sweetly scented.

DOUBLE WHITE KILLARNEY

A pure white "sport" from the pink Killarney; equal to it in all the good points of the latter, superior to it in some. One strong point of superiority is that it has more petals than the parent variety, and these petals are of greater substance, so it is of greater value for outdoor bedding. The buds and flowers are beautiful beyond description; many consider it easily the finest white garden rose.

DUCHESS OF WELLINGTON

The ground color is chrome-yellow, through which run veins of rich orange and shadings of the same running into the rich yellow. (See illustration.)

EDITH NELLIE PERKINS

The outside of the petals is cream and blush shaded, with orange at the base; the inner face is salmon-pink with golden-orange at the base. The flowers are moderately double, produced on long stems and sweetly scented.

As the flowers develop these colors intermingle forming a beautiful cadmium-orange effect; delightfully sweet scented.

MME. EDOUARD HERRIOT

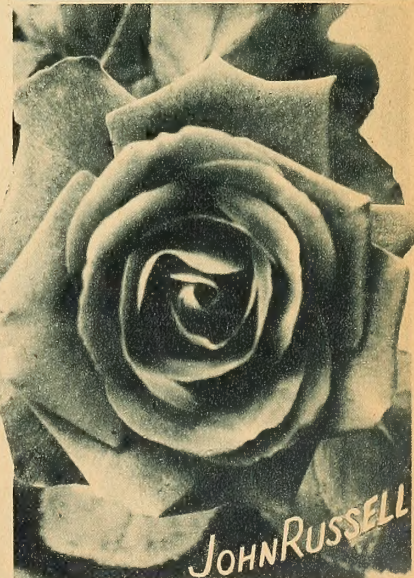

In the bud it is coral-red, shaded with yellow at the base; the open flowers, coral-red, shaded with yellow and bright rosy scarlet, passing to shrimp-red. Flowers of medium size, well formed and not too full. The plant is a most vigorous grower, of a spreading, branching habit, with ample bronzy-green foliage.

Introducing a Sensational Novelty for 1935

"EASLEA'S GOLDEN RAMBLER"

U. S. Plant
Patent No. 114

Shown in colors on Page 3 of cover.

Glorious to an extreme is this new golden yellow climbing rose. Originating in England where it received the highest honors ever awarded a climbing rose, we feel confident that it will also win the hearts of rose lovers throughout the United States.

Easlea's Golden Rambler is not a rambler in the accepted sense of producing clusters of small roses, but on the contrary the flowers are large, perfectly formed and almost 4 inches in diameter and are fully double, containing from 30 to 40 petals. The color is rich deep yellow with splashes of crimson in the center of the flower. The rich olive glow of the foliage and the red flowering wood present a striking and lovely contrast when the plant is covered with flowers. The plant is very vigorous and perfectly hardy.

Price, 2-year-old dormant plants up to April 10th, \$2.00 each; pot-grown plants \$2.25 each.

The World's Premier Introduction of HENDERSON'S "SPOON" CHRYSANTHEMUMS

A Distinct New Type

Perfectly Hardy in the Garden—Lovely for Cutting

Shown in Colors on Front Cover \$2.50
INTRODUCTORY OFFER: Set of Six for

There is an airy charm and daintiness about this type that is not associated with any other chrysanthemum in cultivation. However, notwithstanding their apparent delicacy, they are as hardy as an oak, having come through the extreme cold of the winter of 1933 without the slightest injury.

Under ordinary garden cultivation the Spoon Chrysanthemums develop into symmetrical rounded bushes about two feet high and two feet across, and in the later part of October are covered completely by the dainty flowers which average one and one-half inches across. The flowers are produced on straight wiry stems, thereby making them very desirable for cutting purposes. They are most charming for table decorations.

Owing to their sturdy compact habit, the Spoon Chrysanthemums are also excellent for pot culture. At the 1934 Chrysanthemum show in New York a group of these won an Award of Merit of the New York Horticultural Society.

We offer the following varieties:

No. 1. Elf. Scarlet with terra cotta shadings.

No. 2. Charm. Orange-tipped yellow.

No. 3. Snowstar. Pure white.

No. 4. Dainty. A soft pleasing pink.

No. 5. Fairy. Rosy-crimson.

No. 6. Grace. Soft canary yellow.

Price, any of above 50c each; \$5.00 doz.

INTRODUCTORY OFFER: THE SET OF SIX FOR \$2.50.

HENDERSON'S NEW DAHLIAS

THE CREAM OF THE RECENT HONOR ROLE VARIETIES

I. D. Informal Decorative varieties. F. D. Formal Decorative varieties. S. C. Semi-Cactus varieties.

FRAU O. BRACHT—S. C.

It won greater admiration at last year's A. D. S. Show than any other Cactus Dahlia on exhibition. Its formation is beautiful, a clean-cut, straight-petaled semi-cactus. It is a clear, light primrose-yellow in color. The flowers are of good size but refined in appearance; the stems are strong and the plant, which grows about five feet high, is quite productive.

Price, strong divisions, \$1.50 each; \$15.00 doz.

GOLDEN ECLIPSE—F. D.

First shown in the 1934 A. D. S. Show, New York, where it won the first prize, both in the Best Undisseminated and the Best Formal Decorative Classes. At Brooklyn it won first prize as the best keeping Dahlia; it also received a certificate of merit at Storr's Testing Gardens.

The color is clear golden-yellow with slight blushes of salmon on some of the petals, shading to bright, rich salmon in the center. A pleasing, glowing combination of autumn colors that is as brilliant under artificial light as in the open. The plant is exceptionally vigorous in growth, ranging from 5 to 7 feet in height; the flowers average from 8 to 10 inches in diameter, with a depth of 5 inches. They are gracefully poised on strong stems, which can be cut up to four feet long.

For the Dahlia hobbyist, Golden Eclipse is an undefeated Formal that will be outstanding for its form, its brilliant color, and its keeping qualities wherever shown. At the New York Show all authorities conceded that Golden Eclipse was in better condition at the close of the Show than any other variety on exhibition.

NEW STRAWBERRY "FAIRFAX"

FALL-FRUITING VARIETIES

The varieties described below will produce fruit at the same season as the ordinary strawberries, and keep on bearing until frost; yet to get the best results the blossoms should be kept cut off until August 1st, so as to conserve the energies of the plants for the fall crop. Treated in that way, ripe fruit will be borne in about three weeks after that date and continuously until frost.

Champion Everbearing. This is one of the new varieties that promises to be a decidedly more prolific sort than Superb, which it resembles in habit of growth and appearance of fruit.

Lucky Boy. Claimed to be "the biggest, sweetest, and most productive ever-bearing strawberry as yet produced." From its behavior with us and the enthusiastic reports we have received from other growers, we feel it is destined to be the "ever-bearing variety of the future."

Mastodon. Called by some the Wonderberry. A large, heavy yielding ever-bearing variety of delicious flavor yields a large crop in June and continues to bear berries of amazing size and surpassing quality throughout the summer and fall.

Price of Fall Fruiting Varieties, 75c per doz.; \$4.00 per 100.

Note.—The Strawberry plants offered in this catalog cannot usually be supplied after May 5th. Our summer list of Pot-grown Strawberries is usually ready about June 15th, and is mailed free to customers, or may be had upon application by mail when ready.
